

GMAIL ALERT : UPDATE YOUR PASSWORD NOW!

Think Before You Click. Act Before It's Too Late.

Google has issued a cautionary statement to all Gmail users following a significant data breach that has led to widespread phishing & impersonation attempts. Malicious actors are deploying deceptive Google alerts and login pages to coerce individuals into divulging their passwords. Furthermore, certain fraudulent schemes involve phone calls from individuals falsely claiming to be Google support personnel.

**One wrong click
can cost you your money, data — even your identity.**

Every minute, 280 new malware threats emerge. Stay one step ahead

Gmail Safety Tips

- Change your Gmail password immediately.
- Turn on 2-Step Verification or set up passkeys.
- Be cautious of phishing emails, fake links & suspicious attachments.
- Never share your OTPs or passwords with anyone.
- Stay alert for fake Google calls or messages.
- Always follow Google's official security alerts.
