

SMS BOMBARDING

SMS Bombarding (SMS Flooding) is a cybercrime tactic where attackers use automated bots and scripts to send hundreds or thousands of text messages to overwhelm you, hide important alerts and create opportunities for fraud.

HOW SMS BOMBARDING WORKS

HOW TO PROTECT YOURSELF

Never share OTP, verification codes, or approve authentication requests

If suspicious, block & report to
1930/cybercrime.gov.in
,sancharsaathi.gov.in

Enable MultiFactor Authentication (MFA) on important accounts.

Review your bank, email and online accounts if SMS flooding starts unexpectedly.
