

Crash Fix Scam

Don't Panic. Don't Pay. Don't Give Access.

Crash fix scams are fraudulent strategy where cybercriminals trick users into believing their computer or device has crashed, is infected, or has critical errors. They then offer fake technical support to “fix” the issue — often charging money or stealing sensitive information.

How to Stay Safe

Close the browser, restart your device, Never call numbers shown in pop-ups

Only contact official IT or verified support channels

Do not share login credentials or financial details
