

Be aware of FAKE AI APPS

LOOK REAL | ACT FAKE | STEAL DATA

Cyber criminals create fake AI apps that mimic trusted tools and promise advanced features to trick users into downloading them. These apps may steal personal information, capture login credentials, request excessive permissions or install malware.

Common Tactics Used by Scammers

Malware Distribution

Disguised apps containing Trojans, adware, or spyware that steal browser cookies, login credentials, and cryptocurrency wallets.

Fleeceware

Fleeceware is a type of malware mobile application that come with hidden, excessive subscription fees and keep charging long even after deleted the application

Malicious Ads Links

Malicious sponsored links on social media and search engines leading to third-party lookalike download sites.

SMART CHOICES. SAFER TOMORROWS.
