

Infostealer Malware

“Free Download. Expensive Mistake.”

Downloading free videos, PDFs, or Word files from unknown or non-standard websites may seem harmless. But attackers often embed infostealer malware inside these files. Once opened, the malware can silently steal sensitive information

BEWARE OF:

- Untrusted Websites
- Fake or Odd File Extensions
- Enable Macros Requests

PROTECT YOURSELF:

- Download from Trusted Sources
- Avoid "Free" Files
- Keep Security Software Updated
