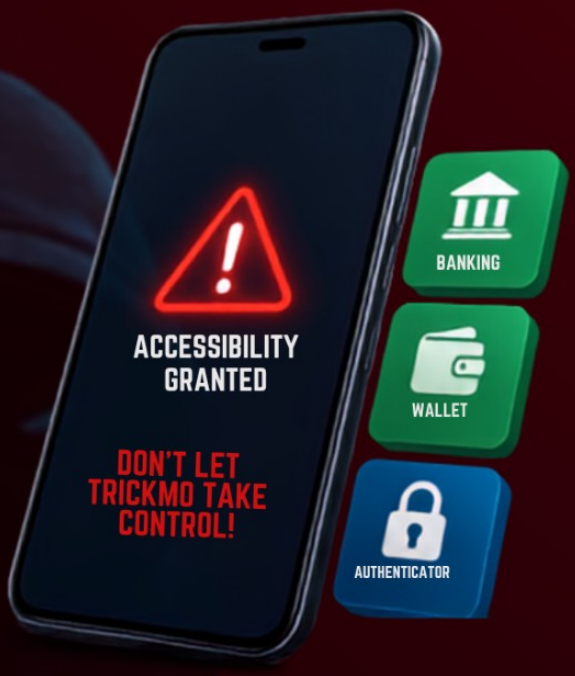
TRICKMO

MALWARE



A dangerous Android malware (DTO) that uses accessibility permissions to secretly take control of your device and steal your money.

WHAT IS TRICKMO?

TrickMo tricks users into granting accessibility permissions using fake apps and social engineering. Once granted, it gains deep control over your device to target sensitive apps and bypass security.

WHAT TRICKMO CAN DO

- MONITOR EVERYTHING
- SUPPRESS SECURITY ALERTS
- RECORD KEYSTROKES
- BYPASS MULTI-FACTOR AUTHENTICATION (MFA)
- INTERCEPT SMS & OTP
- TAKE FULL CONTROL

HOW TRICKMO ATTACKS

SPREADS THROUGH FAKE APPS
Disguised as some popular apps, shared via social media, ads, or unofficial websites.

TRICKS YOU TO GRANT PERMISSIONS
Uses fake prompts to gain control under false pretenses.

TAKES CONTROL SILENTLY
Monitors your screen, captures login credentials, intercepts SMS, and suppress security alerts.

TARGETS YOUR MONEY & IDENTITY
Aims at Banking, Wallet, and Authentic apps to steal funds and bypass MFA.

ONCE INSTALLED, IT'S HARD TO DETECT.
PROTECT YOURSELF BEFORE IT'S TOO LATE!

PROTECT YOURSELF

- Download apps only from Official Play Store
- Avoid clicking on suspicious links or ads
- Never grant accessibility permissions to unknown apps
- Keep your device and apps updated
- Use a reliable mobile security solution
- Enable Android's in-built automated security system
